Containerized Membrane Bioreactor (MBR)

Turnkey project for a 20' containerized MBR plant for the military. The MBR container is designed to treat wastewater under extreme conditions between -26 to 120 Fahrenheit. The effluent is directly discharged to the local ground surface. The plant is completely mobile and meets international transport regulations.

Customer:	Federal Office of Defense - Germany
Capacity:	300 person equivalent
Influent:	Wastewater from military camps
Technology:	Immersed microfiltration modules
MBR Modules:	M20-001
Quantity:	6
Pore size:	0.4 μm
