## Containerized Water and Wastewater Plant

Supply of a containerized treatment system applying a Membrane Bioreactor (MBR) and a water treatment stage. The MBR stage treats municipal wastewater that is being discharged into fishing waters. The water treatment container is designed to treat well water containing oil to generate drinking water.

Customer:	Dobersek Engineering GmbH
Capacity:	26,000 gpd
Influent:	Well water and municipal wastewater
Technology:	Immersed microfiltration modules & multistage water filter
MBR modules:	M70-002
Pore size:	0.1 $\mu\text{m}$
Temperature range:	-26 to 120 Fahrenheit
